Windows Standard Web Hosting

[Download pdf](#)

The starter package is recommended for small businesses and home enthusiasts who want a hosting package that allows for site expansion but don't want to commit to an expensive solution.

Server and data centre.

Using our Windows hosting services you can run your web site(s) and enjoy the comfort and reliability of the Windows platform. All our Windows servers run on the Windows 2000 operating system installed for optimal security, performance and stability. The Windows boxes currently run on DUAL Pentium IV Xeon 2400 MHz HT, 2048MB RAM, 9GB SCSI, 36GB SCSI.

With 99.9% network uptime and Uninterruptible Power Supply, 24x7 Network Monitoring, 24x7 Security Surveillance and Biometric access.

Server Software

- Control Panel
- Full FTP Access
- Windows 2000 Operating System
- IIS
- Perl 4 and 5.6.0
- PHP 4 and 5
- MySQL
- PostgreSQL
- FrontPage 2002 Extensions
- MS SQL Server
- ASP and ASP.NET

Features

The starter package comes with

E-MAIL VIRUS SCANNING and ANTI SPAM FILTERS

The package comes with email virus scanning and anti-spam filters installed, limiting your risks and junk mail on the Internet.

FREE WEBMAIL ACCESS

All our web hosting accounts come with web-mail access. So you can retrieve your e-mail by simply going to the following Url and logging in: **http://mail.yourdomain** and typing in your username and password provided.

YOU WILL HAVE CONTROL OVER YOUR WEBSITE AND EMAIL

If you want control of your web hosting, you're web hosting package can include a fully-featured web-based control panel that allows you to manage your domain through any browser. Allowing you to add and remove email address check your stats and get traffic reports on your domain.

YOUR WEB HOSTING WILL BE LIGHTNING QUICK, STABLE AND SECURE

Our servers are located in the unet infrastructure- ensuring that your site is as fast as possible. Our service has an uptime of 99.9%.

YOUR WEB HOSTING WILL PROVIDE PHP

PHP is a general-purpose scripting language that is especially suited for Web development and can be embedded into HTML. It was voted programming language of 2004 and has recently overtaken asp as the primary web development language.

YOUR WEB HOSTING WILL PROVIDE ASP

ASP: Active Server Pages, is a Microsoft Technology which can dynamically edit, change or add any content of a Web page, respond to user queries or data submitted from HTML forms. Scripts in an ASP file are executed on the Server.

YOUR WEB HOSTING WILL PROVIDE MYSQL DATABASES

The MySQL® database has become the world's most popular open source database because of its consistent fast performance, high reliability and ease of use. It's used in more than 6 million installations ranging from large corporations to specialized embedded applications. - www.mysql.com
